TRAINING PROGRAM

Introduction to SAP FIOR/UI5

Description :

FIORI UI5 technology enables you to understand the functionalities of SAP Fiori applications.
With this training course, master the basics of FIORI programming and discover UI5 design concepts.

Training objectives:

- Discovering and understanding the SAP Fiori language
- Build a Fiori application from scratch
- Use WebIDE to develop
- Use MVC architecture to develop a Fiori application
- Discover UI5 concepts

Reference: FIORI-001	**Language:** English | French
Level: Beginner	**Duration:** 3.5 days (17.5 hours)
Inter: Check the dates of upcoming sessions on our website	**Intra:** Course fees and dates available upon request

2174 € excl. tax

Profile:

- Developers
- Project managers
- Consultants
- Technical support staff

Teaching methods:

- The course includes theoretical contributions, practical demonstrations, reflections and case studies.
- Access to an account on our e-learning platform.
- Digital documentation provided during the course
- A sign-off sheet is signed on completion of the course.

Requirements:

- In-depth knowledge of a programming language

Assessment and monitoring:

- Self-assessment by a multiple-choice questionnaire (MCQ).
- An assessment of learner satisfaction at the end of the course and a follow up assessment 3 months after its completion.
- Training certificate issued to the learner

Instructor profile:

All our training courses are led by experienced consultants and intsructors recognized by their peers. Our trainers are certified in each of their areas of expertise and share their consulting experience during training sessions.

Detailed program:

Introduction to SAP FIORI

- The SAP FIORI concept
- SAP Fiori design principles
- SAP Fiori architecture
- Presentation of the SAP Business

Creating a SAPUI5 application

- Steps in creating a SAPUI5 application

MVC architecture

- Introduction to MVC architecture
- SAP UI5 models
- SAP UI5 views
- Controllers
- Practical exercises

Component and application descriptor

- Component
- The application descriptor
- FIORI application structure

Data binding

- Binding Data
- Practical exercises

Routing and navigation

- Routing and navigation
- Practical exercises

Deploying a FIORI application

- Deployment objectives
- Deployment options
- SAP Fiori Launchpad
- Practical exercises
